HOCHTIEF (UK) Construction Ltd is please to announce that they have been shortlisted for the Medium Project of the Year Award at the Construction News Quality in Construction Awards 2007 in London.

Page 1 of 2
01.03.2007

HOCHTIEF (UK) was commissioned by client Westminster City Council to replace a series of 19th century bridges with a new composite six lane structure to remove a traffic bottle neck.

BRIDGE LAUNCH

This design and build contract involves the demolition and replacement of Bishop's Bridge Road bridge in order to improve vehicular access to Paddington Station. Bishop's Bridge Road spans fourteen Network Rail lines, two London Underground lines, the Grand Union canal, a Thames Water sewer and a disused goods yard site. It also lies at the entrance to one of London's busiest railway stations.

Taking these combined challenges into account and with maximising safety and minimising disruption as key priorities, an innovative solution was developed.

About the project:

This design and build contract involves the demolition and replacement of Bishop's Bridge Road bridge in order to improve vehicular access to Paddington Station.

Bishop's Bridge Road spans fourteen Network Rail lines, two London Underground lines, the Grand Union canal, a Thames Water sewer and a disused goods yard site. It also lies at the entrance to one of London's busiest railway stations.

Comments:

Sally Sunderland – Project Manager

“We are extremely proud that we have been shortlisted for this award which could possibly be the fourth for HOCHTIEF within three months; it represents three years of hard work and careful planning and is a credit to all the parties who contributed to the success of the Project”.

HOCHTIEF is one of the leading international providers of construction-related services. With more than 66,000 employees and a sales volume of EUR 18.17 billion in FY 2009, the company is represented in all the world's major markets. The Group's service offering in the fields of development, construction, services, concessions and operation covers the entire life cycle of infrastructure projects, real estate and facilities. In the USA, the biggest construction market in the world, HOCHTIEF is the No. 1 general builder via its subsidiary Turner and, with Group company Flatiron, ranks among the most important players in the field of transportation infrastructure construction. With its subsidiary Leighton (HOCHTIEF share around 55 percent), the Group is market leader in Australia. Because of its engagement for sustainability, HOCHTIEF has been listed in the Dow Jones Sustainability Indexes since 2006. Further information is available at www.hochtief.com/press.

HOCHTIEF Construction as a service-oriented construction company bundles the traditional core business of the HOCHTIEF Group in Europe. This mainly includes building construction, and civil and structural engineering. The company has specialized in complex market segments such as high-rise buildings, airports, tunnels and power plants. HOCHTIEF Construction is the management company of the Europe corporate division which employs more than 9,000 staff. In addition to the classical construction business, the partnership-based business model PreFair and the property development business format, the company offers its clients comprising service packages. Further information is available at www.hochtief-construction.com.

HOCHTIEF (UK) Construction is a fully owned subsidiary of HOCHTIEF Construction. Renowned for engineering excellence and innovative solutions, the company specializes in complex market segments such as Transportation, Energy, Marine Works, Tunnelling, Building and Civil and Structural Engineering. The Group unit that provides its customers with a reliable quality service currently employs more than 150 people and operates in Swindon. Further information is available at www.hochtief.co.uk.
